UNITED STATES POST OFFICE DEPARTMENT

POSTAL ZIP CODE DIRECTORY

SAN DIEGO, CALIFORNIA

(State Zip Code Abbreviation—CA)

HOW TO USE

ZIP Code is a five-digit code which identifies a delivery unit and associates that unit with a major post office through which mail is routed for delivery.

The first digit identifies one of ten large areas of the nation. The first three digits identify a major city or major distribution point. The five digits identify an individual post office, a zone of a city, or other delivery unit.

This directory has been published to assist you in determining the ZIP Code applicable to various streets in one city. The addition of the ZIP Code to the address on mail will expedite the distribution and forwarding of your mail to the point of delivery.

Contact your local postmaster for instructions concerning the adding of ZIP Code numbers to your mailing list.

In this directory, the three digits appearing at the top of each column should precede the two digits listed opposite the street entries. Where no house numbers are shown, the entire street is within the area of the ZIP Code indicated.

When the word "Out" appears after a number, it signifies that particular house number and any higher number on that particular street is within the ZIP Code area indicated. For example:

	ZIP Code
Washington Ave	402
1100—Out	03

indicates all house numbers on Washington Avenue from 1100 upward apply to ZIP Code 40203.

Mail formerly addressed using a Postal Zone number should now use a ZIP Code. For example:

Mr. John Doe
2103 Washington Avenue
Louisville 3, Ky.

Should be addressed:

Mr. John Doe
2103 Washington Avenue
Louisville, Ky. 40203

Your cooperation in using the ZIP Code is appreciated. For further information, call your postmaster.

ZIP CODES
FOR
SAN DIEGO, CALIFORNIA

977–922

SAN DIEGO, CALIFORNIA

ZIP Code Directory

HOW TO USE THIS DIRECTORY

In this directory, the three digits appearing at the top of each column should precede the two digits listed opposite the street entries. Where no house numbers are shown, the entire street is within the area of the ZIP Code indicated.

When the word "Out" appears after a number, that number and any higher number on that street is within the ZIP Code area indicated. For example:

	ZIP Code 402
Washington Ave.	
1100—Out	03

indicates all house numbers on Washington Avenue from 1100 upward have ZIP Code 40203. All listings not specifically designated as avenue, court, lane, drive, etc., are streets.

HOW TO USE ZIP CODE IN ADDRESSES

The ZIP Code should appear on the last line of both the mailing and return addresses following the city and State. The gap between the State and ZIP Code should not exceed six-tenths of an inch.

Example:

Mr. Harold Jones
3025 Theresa Street
Arlington, Virginia 22207

FOR ZIP CODES NOT LISTED IN THIS DIRECTORY, CALL 293-5410

WHAT IS ZIP CODE?

- ZIP Code is a five-digit geographic code that identifies areas within the United States and its possessions for purposes of simplifying the distribution of mail by the U.S. Post Office Department.
- In devising the ZIP Code, the United States and its possessions were divided into 10 large geographic areas. Each area consists of three or more States or possessions and is given a number between 0 and 9.

ZIP CODE NATIONAL AREAS

- Because of favorable transportation facilities, key post offices in each area are designated as Sectional Centers. Each Sectional Center post office receives and transmits mail moving *between post offices within its section.* It also receives and transmits all mail moving *into or out of the section.*

WHAT YOUR ZIP CODE MEANS

EXAMPLE

- Together, the *first three digits* of any ZIP Code number stand for either a particular Sectional Center *or* a metropolitan city.
- The *last two digits* of a Sectional Center ZIP Code number stand for one of the *associated post offices* served by the Sectional Center.
- The *last two digits* of a metropolitan city ZIP Code stand for one of the *delivery areas* served by the city post office, its branches and stations.
