Dear Mr. Swift:

The Public Law under which we function (PL 89-749) requires the involvement of Consumers.

We define the consumer as one who does not earn his livelihood from the Health Industry.

During our two and a half (2½) years of operation we have found that the individual citizen does have a great deal to contribute to the health planning activity.

We are writing to request your assistance in locating consumers to serve on the Committees of this Association.

Attached you will find an Organizational Chart which depicts the five Standing Committees, Health Facilities and Services, Health Manpower, Mental Health and Mental Retardation, Personal Health Services and Environmental Health. Attached you will also find a Committee Meeting Schedule which gives information on each Committee, as well as a packet of general information on the Association.

Your assistance in this thrust for greater consumer involvement is appreciated.

Sincerely,

Richard F. Jacobsen
Executive Director
