Leon Williams, Chairman
County Board of Supervisors
1600 Pacific Hwy.
San Diego, CA 92101

Dear Mr. Williams:

It has come to my attention that many of the departments that you work with, such as Social Services, Sheriffs department and others are in need of quality computers at reasonable prices. I am interested in working with you and your associates to provide computer systems to meet your needs.

The computers I have to offer are the latest state-of-the-art IBM Compatible computers assembled in California out of quality components. They all carry a one year warrantee on parts and labor. They include the 286, 386 and 486 systems with a range of speeds up to 40 MHZ. The 386 and 486 systems can be set up for or hooked up to Local Area Networks (LAN).

Because I am a manufacturer's representative, I can offer the systems at prices that are very attractive. Enclosed you will find a spreadsheet that gives the cost of the basic systems and the additional costs for adding extra components. The systems can be custom made to meet the needs of the customer.

At your next Board of Supervisors meeting would you please consider how these computers and prices can be beneficial to San Diego county. If you feel they can be of benefit to you, please circulate this letter and price sheet to the departments you work with.

I hope I can serve you and your needs in the future. If you have any questions or comments or if you would like to order a computer please feel free to call me.

Sincerely,

Robert E. Welty
