Rewrite for Leon

Statement of Leon Williams

In San Diego we have developed tremendous pride in our city as we have grown up and become "major league" in so many ways.

Yet despite our progress and growth we must still face up to the many problems which remain unsolved--~~the~~ tougher problems which have no easy solutions.

My months on the council have given me an excellent insight into the perplexing issues which lie ahead for San Diego. I feel that my work as an administrative assistant to the sheriff and as the director ofthe Neighborhood Youth Corps, ~~as well as my graduate studios at San Diego State College~~, have prepared me to face and cope with the urban and social problems the council will be dealing with in the Seventies.

It is my pledge that these problems--both physical and social--shall not go unnoticed. a city must be a city for all of its people and the needs of all must be recognized and dealt with.
