Revised Statement
11/21/89

Statement: The Treasurer of this committee is using Schedule D for the following information because he doesnt know where else it fits. Certain contributions were received during the covered period but were not deposited until the period beginning 7/1/89. These contributions were such where the Treasurer's records indicated they were part of a cumulative amount in which, (a)The contributor had maximized since 7/1/86, or (b)The contribution was for two people. one of whom had already maximized, or (c)The cumulative amount toward maximization was less than the amount of the check. Supervisor Williams, by consultation with County legal officials and other members of thge Board of Supervisors, was seeking clarification of new laws incurred by recently passed Propositions 68 and 73 regarding contributions received, anomolies created by the propositions in terms of Count vs State law, and other items of apparent discrepencies currently being ajudicated in the courts. Therefore, contribution checks were held in interim while clarification was being sought.This was done so that Mr. Williams could avoid the embarrassment of returning checks to contributors and subsequently learning that such contributions could have been made. When he was unable to conclusively clarify these issues, Supervisor Williams authorized the Treasurer to take appropriate action concerning the held contributions. This was on July 8, 1989--after the end of the current period. Scedule D therefor contains information on certain contributions received but not deposited, thus not affecting this period's monetary situation. All such amounts finally deposited and/or returned to contributors will be specified on Form 490 for the period 7/1/89 through 12/31/89.
