Chark Guny jisat spent it days hes wisth
ses and went anday saying hewas ini, Banadise.. The fand is coming along well and he certaing Sherol is stagended a few days for plantingeddoes and Ruret potatoetha She garden is bow produccigg he hove on lot sich prem, oicha, cucumber, ete. But we have sa lot si blaunting to do to produce afl ou our starchery. (Mosetk what is called "grourd proviswine" Whist jo squect 4 bith casara, eddae, swect poratre :) Also. of coruse we grow a lot of cuthaso been and eggdant - O both growt uee in Dtaci area. We als. grow a Nlot a baxanas, plawtainfi and pireapgle we are stanting' cashen friut

Every good to eat, and pappaza. For protein we use chickens t eggs which tue raise, pork tron our prigiry anal fish wateih are mi s although of totally self abresodane Rugoghy. Although not totally self t goal. Bur cutlass beans also supply protein. Hie is an item vire frupehase which of cones is indegiones to Guyana tho, not to our died tho we ane growing sombre vairetie. . Ne abs are aspen fining growing rabbits for protein since they are proffer and good proper, but jigs started on this Wi are going to get, a dear cow for milk too. Tivesto che nut be treated canfully in the tropics, tho one caul succeed with Hr right Lrarieteis), but he cacetiono to prevent certain diseases i freigquses. Wee ane also expenmeisting grownig Deffer (tureety!) and species., l le will probably grow citrus for a cash shops but as you may know it takes 5 yeans to produce. Citrus grows well in the tropics tho the outside skin is not orang in Color since the re are no frosts. However, The inside is orange I Sweet S expect we will hame good resulted ki the bong rus watt Ditrio. Well enough of the agriculture rypoit. Sou must got the picture of a berg busy community.

Wee alp just cleared 300 move acres of jingle for agrecuthre. Lou ought to see our crews 4 the. Ane. Indian. telling trues. Ito gite unusual.
pet slothe. In case you airn t fanmleai viets sloths they are funn fursy thu creatuses who Trove $v-e-r-y-C$ Et-0.n-1-y, They have cotet sonike and this wariety Diveng practful the the 2 - toed Slotha ane ginte cantanlecsomo Q am toled. Thiy juist ha The chibdren have nuade up several cure culips soigo about eluyana iuchideng our banana buanch. Our gie dancing $I /$ banana branck. Oun merfory Nowny visitions have enyoijed the the alos do pome
 olayo and Pirty

The brat $\overline{\text { Sis inadio' }}$ toin none bucheine up supfolis and somie feetble. She boat lour tiaking tramber) gres, to town once or 2 temeo a month and endo wo used for tranaport," rathen Then fishing. So we Qre consoduring penchase of a balbyber for Short river Muno to e Lchange produce s) for rishing. Our boat alao pueko xap fumber for constructoin from are beconuin ouite a comels pelong the river We are beconuing quite a community anel we are the most suckessful aghicutional profect in wh of the intenoir ban hone. do say ael government offrivils who corn theres Pur agrenthal anetardo, ane improving oll the tinue. There is defrintsy. a lof to gtenow in scoitfi tropecial agircenture.

Cunie 1 laio are both very fini. Laino io in the pre-school progham. Ensie

On doctor gave charndes Ghry the moste thorough fheysical he has ever hbod tin hi hife he said. P.S. If you the haverig a lot of Stones medi in que. poople here suggent you should hane your endocrine system checked. Thet can aloo be relate it to thyriond they say, so be suse to hame it cheeked thoronghally.

- O arr having this mailed from the Stater or someone Going back as $S$ that. It would git the $\begin{aligned} & \text { waste. } \\ & \text { ore }\end{aligned}$

You would beshackod to Sememe as $y$ am hen tame For the first time win n min
