Dear Mom and Dad,

Hi, and how are you both doing? I thought I would send you a letter on my good old Olympia typewriter which is still typing as good as it did ten years ago when you got it for me for my 9th. grade graduation present. It sure is a good typewriter and does get quite a bit of use, so it is not going to waste. I have been keeping track of our medical supplies house with a friend of mine and we are busily filling it up. It gets to be quite a job. We are busily growing more bahana trees, which are a-plenty here, along with ettoes, cassava and much more. Well Larry has delivered another baby, a little boy this time. We had three in one week-- two little girls and one little boy. It is really something else, we have our own delivery team which I am a part of. We have so far, seven more babies to go I believe so we are really becoming part of "production" here in Jonestown.

We have our entertainment committee all rehearsed as they are going into town for a presentation at Guyana's main auditorium for a large festival. You should see the presentation. They will probably do it for you one night when you come here. We have our own Mom's Maybley and our own "Committee", musical talent and the rest. I would be going also except that there are already enough musicians going and someone needs to be here to present the programs for visitors who are going through. The entire town of Georgetown is waiting for our arrival because they have heard our organist, Diane sing before and they loved her. We have dancers, one of whom does a dance with a baby green boa constrictor, who is 7 feet long. She does an exceptional job with the snake, especially after an only short period of practice. Some of our young men, Stephen included, went out to the bush to find the snake, because no snakes will roam anywhere near here. I should include one of my pictures that I have recently drawn, but I have sent them to Georetown to be sold so I can make some extra money. I am going to make some more though.

If you could send me some things I would appreciate it. I could use some type of plastic or rubber rain jacket or coat, not a windbreaker jacket, but actual rain jacket. Also I could use

[Turn over to the other side]

some rubber boots that are good for working in, some cool shirts (cotton) and any extra sheets that you may have. Also I could use some 25¢ snort rag scarfs (they are that much if you go to discount houses and they come in all different colors). One thing you need is these kind of scarves to hold your hair back when you are working. Weell, I will see you when you come and you will probably hear from me before then.

Kimo, Jim And Carolyn send their
love, and Love from

Be sure to bring enough cool clothes with you when you come - plus rubber boots & rainwear - in case it rains. You will have to have the boots if it does rain. So mom don't bring your dress up shoes only. Dress-up night will be later on in the evenings.

If you want you can also bring me some light weight working pants, I'm not sure of the size - probably the same size I've always been and some of those rubber thongs or whatever. I think my waist is 29 and length is 34. But I don't know how it rates in none-Levi pants which are cooler than Levi pants.
