B.A. in education

I was in the first "group" to go from S.D. Teachers College on Park Blvd. (where the Ed. Center is) way out to the new school. I received my B.A. degree in Education and had teaching credentials for elementary and junior high schools. My majors were history and English (journalism). I was always on the Aggie and the annuals - and later did newspaper work in San Diego.

In 1934 Willis J. Kenline and I were married. He also attended S.D.S.U. as an engineering student before going to U.C. Berkeley and getting his degree in electrical engineering. We had three children, Hina, Flora and George. Fortunately, we have had several in our family graduate from State in the ensuing years.

I know all you want are the facts - but I had to add a little more - which would interest very few - after these many years.

(1-619-284-4261)

Thank you best wishes
