

MAY 15, 1993

Dear Pat:

Got your notice for pre-50
Alumni so I will try to give you
some news on this Pre-50 Alumni passed.
I went to San Diego State as a freshman
in 1932. I always wanted to be an
engineer because I loved to draw things,
mainly mechanical, however I did do
quite a bit of design work on stores,
Food markets, houses etc. However about
that time Pearl Harbor was attacked
and my draft board told me I must
get into the defense Industries or be
drafted into the Army, so I got a job
in the engineering dept at Rohr Aircraft
down in Chula Vista. I worked at
Rohr all thru the war. At the end
of the war I went into the Home design
business in Chula Vista since housing
projects were springing up all over.

This lasted for a time but shortly
family problems took over and my wife
and I separated with her taking our

little girl Jean.

A year or so went by and I remarried to Jeannette my present wife. We have raised 4 children which have all grown and married with the exception of our youngest son who is still single and lives in Providence, Rhode Island.

Jeannette and I have been married since May 18, 1937 so it has been a permanent and wonderful marriage.

It is pretty wonderful to have 3 grand-children - (all girls so far) and they live close enough that we see them whenever we want. We have lived in the Portland area ever since we left San Diego. We do have a beautiful view of Mt. Hood just 50 Mi. east of Portland. The mountain is over 11,000 ft high and has snow on it the year-round so it is a skiers heaven. We are also 50 mi. from the good ole Pacific ocean. So we have some nice choices for travel and scenery. There are lots of Fir tree forests in the Coast range of mountain and timber is the big thing.

Well Pat that's it for this time & when
you get a chance come up and visit
this beautiful country when you can,
you'll love it. Well that's it for
now, and we'll be thinking of you
till next time

As Ever Your friend

G.H. FOWLER
