Elizabeth Thurston '34

May 31

Dear Helen Wetzel Wallace

My husband Bill Thurston (not to be confused with the equally nice Bill Thurston who had a men's clothing store), who helped to move S.D. State over from the Normal School and also did my first husband Floyd Hulbert started attending State in '29 but ended up graduating from Col in 35.

Bill recently celebrated his 80th year by receiving his latest patent and filing.

His Electro-Optical instruments played a part in producing the accuracy of our weapons in the Persian Gulf.

I attended State during my Junior year - 1932-33, after

No Contest for 45 years we have now been married almost 43 years.

In retirement Rose delights in her 5 very much grandchildren who I am sure will carry on his tradition. Since retiring he has spent much of her time setting carefully upon his treadmill as he drives 10 miles a day to Micro-Radian Instruments in Troy Mercer where he was the development and where her son Tom Contenesse to manage it.

While at State I was introduced to Dr. Ley Everett H. Jackson and continued my studies at the Art Institute in Chicago.

Elizabeth Thurston

Dear Letter Drawers as Helen Hennebach's Queen.

We both have believed in seeing all the world we can while we are on it. I continue to get much pleasure from my painting and my lovely garden.

Thanks —

Elizabeth Stevens Hubbell Thurston
