

MS-0469-001

LET IT PASS.

Let former grudges pass, — SHAKESPEARE.
Do not swill to take offence.

"Anger is a foe to sense;
Brood not darkly o'er a wrong
Which will disappear ere long;
Rather sing this merry song—
Let it pass!
Let it pass!

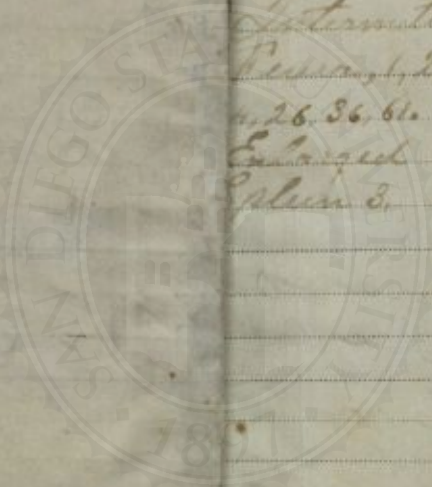

Strife corrodes the purest mind;
As the unguarded wind,
Any vulgar soul that live
May encounter without reprove;
'Tis the noble who forgive,
Let it pass!
Let it pass!

Echo not an angry word;
Think how often you have erred;
Since our joys must pass away,
Wherefore should our sorrows stay?
Let them pass!
Let them pass!

If for goon you've taken ill,
Oh! be kind and gentle still;
Time at last makes all things straight;
Let us not resent, but wait,
And our triumph shall be great;
Let it pass!
Let it pass!

Bid your anger to depart;
Lay these homely words to heart,
Follow not the giddy throng;
Better be wronged than wrong;
Therefore sing the cherry song—
Let it pass!
Let it pass!

Let it pass!
Let it pass!
Let it pass!
Let it pass!
Let it pass!
Let it pass!
Let it pass!
Let it pass!

LET IT PASS.

"Let former grudges pass, 'Tis SHEARSFEARD,
 To his swift to take offence,
 Let it pass!
 Anger is a foe to sense;
 Let it pass!
 Brood not darkly o'er a wrong
 Which will disappear ere long;
 Rather sing this merry song—
 Let it pass!
 Let it pass!
 Strife corrodes the purest mind;
 Let it pass!
 As the unguarded wind,
 Let it pass!
 Any vulgar souls that live
 May chide him without reprieve;
 'Tis the noble who forgive,
 Let it pass!
 Let it pass!
 Echo not an angry word;
 Let it pass!
 Think how often you have erred;
 Let it pass!
 Since our joys must pass away,
 Like the dew-drops on the spray,
 Wherefore should our sorrows stay?
 Let them pass!
 Let them pass!
 If for good you've taken ill,
 Let it pass!
 Oh! be kind and gentle still;
 Let it pass!
 Time at last makes all things straight;
 Let us not resent, but wait,
 And our triumph shall be great;
 Let it pass!
 Let it pass!

 "Whice, will disappear ere long;
 "Rather sing this merry song—
 "Let it pass!
 "Let it pass!
 "Strike corrodes the purest mind;
 "Let it pass!
 "As the unguarded wind,
 "Let it pass!
 "Any va'gar souls that live
 "May concern without reprieve;
 "'Tis the noble who forgive;
 "Let it pass!
 "Let it pass!
 "Echo not an angry word;
 "Let it pass!
 "Think how often you have erred;
 "Let it pass!
 "Since our joys must pass away,
 "Like the dew-drops on the spray,
 "Wherefore should our sorrows stay?
 "Let them pass!
 "Let them pass!
 "If for goon you've taken ill,
 "Let it pass!
 "Oh! be kind and gentle still;
 "Let it pass!
 "Time at last makes all things straight;
 "Let us not resent, but wait,
 "And our triumph shall be great;
 "Let it pass!
 "Let it pass!"

LET IT PASS.

Let former grudges pass, 'Tis the swiftest way to take offence.
 Anger is a foe to reason; Let it pass!
 Blood not darkly o'er a wrong Which, with disappear ere long; Father slung this merry song.
 Let it pass!
 strife corrodes the purest mind; Let it pass!
 As the unguarded wind, Let it pass!
 Any vulgar souls that live May condemn without reprieve; 'Tis the noble who forgive; Let it pass!
 Echo not an angry word; Let it pass!
 Think how often you have erred; Let it pass!
 Since our joys must pass away, Let it pass!
 Like the dew-drops on the spray, Wherefore should our sorrows stay; Let them pass!
 If for good you've taken ill, Let it pass!
 Oh! be kind and gentle still; Let it pass!
 Time at last makes all things straight; Let it pass!
 Let us not resent, but wait, And our triumph shall be great; Let it pass!

LET IT PASS.

Let former grudges pass. — SHAKESPEARE.
 As the ups and downs of life
 Anger is a foe to sense;
 Brood not darkly o'er a wrong
 Which will disappear ere long;
 Rather sing this merry song—
 Let it pass!
 Let it pass!

Strife corrodes the purest mind;
 As the unguarded wind,
 Any vulgar souls that live
 May condemn without reprieve?
 'Tis the noble who forgive;
 Let it pass!
 Let it pass!

Echo not an angry word;
 Think how often you have erred;
 Since our joys must pass away,
 Like the dew-drops on the spray,
 Wherefore should our sorrows stay?
 Let them pass!
 Let them pass!

If for good you've taken ill,
 Oh! be kind and gentle still;
 Time at last makes all things straight;
 Let us not resent, but wait,
 And our triumph shall be great;
 Let it pass!
 Let it pass!

LET IT PASS.

Let former grudges pass, 'Tis shamefearful,
 As 'tis, swift to take offence,
 Let it pass!
 Anger is a foe to reason;
 Let it pass!
 Brood not darkly o'er a wrong,
 Which, will disappear ere long;
 Rather sing this merry song,
 Let it pass!
 Strife corrodes the purest mind;
 Let it pass!
 As the unguarded wind,
 Let it pass!
 Any vulgar souls that live
 May chide us without reprove;
 'Tis the noble who forgive,
 Let it pass!
 Echo not an angry word;
 Let it pass!
 Think how often you have erred;
 Let it pass!
 Since our joys must pass away,
 Like the dew-drops on the spray,
 Wherefore should our sorrows stay?
 Let them pass!
 If for good you've taken ill,
 Let it pass!
 Oh! be kind and gentle still;
 Let it pass!
 Time at last makes all things straight;
 Let us not resent, but wait,
 And our triumph shall be great;
 Let it pass!

WORTH KNOWING.

Says the *Scientific American*: If mosquitoes or other bloodsuckers infest our sleeping rooms at night, we uncork a bottle of the oil of pennyroyal, and these animals leave in great haste, nor will they return so long as the air in the room is loaded with that aromatic herb. If the rats enter the cellar, a little powdered potash thrown into their holes or mixed with meal and scattered in their runways, never fails to drive them away. Cayenne pepper will keep the buttery and stove room free from rats and cockroaches. If a mouse makes an entrance into any part of your dwellings, saturate a rag with cayenne, in solution, and stuff it into the hole, which can then be repaired with either wood or mortar. No rat or mouse will eat that rag for the purpose of opening communication with a depot of supplies.

POOR MAN'S HARD SOAP.—Put in an iron kettle 5 lbs. unslacked lime, 5 lbs. sal soda, 2 gallons soft water, let it soak one night; in the morning pour off the water, then add to the water 3 1/2 lbs. of grease, boil till thick, turn into a pan to cool, when cool, cut in bars.

SOMETHING ABOUT YOURSELF.—Supposing your age to be fifteen years or thereabouts, I can figure you up to a dot. You have 160 bones and 500 muscles; your blood weighs 25 pounds; your heart is five inches in length and three inches in diameter; it beats 70 times a minute, 4,200 times per hour, 100,800 times per day, and 28,725,200 per year. At each beat a little over two ounces of blood is thrown out of it; and each day it receives and discharges over seven tons of that wonderful fluid. Your lungs will contain a gallon of air, and you inhale 21,800 gallons a day. The aggregate surface of the air cells of your lungs, supposing them to be spread out, exceed 20,000 square inches. The weight of your brain is three pounds; when you are a man it will weigh about eight ounces more. Your nerves exceed 10,000,000 in number. Your skin is composed of three layers, and varies from one-fourth to one-eighth of an inch in thickness. The area of your skin is about 1,700 square inches, and you are subjected to an atmospheric pressure of fifteen pounds to the square inch. Each square inch of your skin contains 3,500 sweating tubes or perspiratory pores, each of which may be likened to a little drain tile one-fourth of an inch long, making the aggregate length or entire surface of your body of 201,300 feet, or a tile ditch for draining the body almost forty miles long.

WINDSOR AND CASTILE SOAP.—To make the celebrated Windsor soap, nothing more is necessary than to slice the best white soap as thin as possible, and melt it over a slow fire. Take it from the fire when melted, and when it is just lukewarm, add enough of the oil of caraway to scent it. If any other fragrant oil is liked better, it may be substituted. Turn it into moulds, and let it remain in a dry situation for five or six days. To make Castile soap, boil common soft-soap in lamp-oil three hours and a half.

No. 68

Dr. E. J. King M. D.

CURE FOR HOARSENESS.—A physician has at last come to the relief of the much-afflicted professional speakers and singers with a "sure cure for hoarseness." With singular disinterestedness and communicativeness, which is remarkable on the part of one of the secretive medical fraternity, Dr. Corson, in the Medical Record, makes known this simple and immediate remedy:—Ten minutes before any continuous effort at speaking or singing, a lump of borax the size of a pea, if held in the mouth and slowly dissolved and swallowed, will render the voice soft and silvery for an hour. It is perfectly harmless, only stimulating the secretion of saliva. It is not claimed for the borax that it will break up cold, but for this purpose a small dose of nitrate of potass, taken at night with a glass of water and supplemented by extra covering, is warranted to ward off the monster, if taken at its approach.

Maxims.

Three things to govern—Temper, Tongue and Conduct.

Three things to think about—Life, Death and Eternity.

Three things to pray for—Faith, Peace and Purity of heart.

Three things to wish for—Health, Friends and a cheerful spirit.

Three things to avoid—Idleness, loquacity and slippant jesting.

Three things to contend for—Honor country and friends.

Go slowly to the entertainments of your friends, but quickly to their misfortunes.

The character of the soul is determined by the character of its God.

Three things to love—Courage, gentleness and affection.

Three things to admire—Intellectual power, dignity and gracefulness.

A well-bred man will not insult me, no other can.

Three things to hate—Cruelty, arrogance and ingratitude.

Three things to delight in—Beauty, frankness and freedom.

Valuable Recipes.

FOR STOPPAGE OF WATER IN HORSES.

—Most persons give horses nothing but nitre for this complaint. Too much nitre has a very bad effect on the kidneys.— The best remedy now used by Farriers, is nitre, 1 oz; oils of sassafras and juniper, of each ½ oz. As a diuretic, oil of juniper is much better than nitre, and has none of its bad effects. Mix the above articles, and give when you have occasion to, and you will find it is a certain remedy.

WHEN you want to buy condition powders, take this recipe to the drug store, and you will get four times the amount for the same money, and a great deal better condition powder than most any you can buy: Powdered fenugreek seed, cream of tartar, gentian, sulphur, saltpetre, resin, black antimony and ginger, of each 1 oz; cayenne pepper, ½ oz; mix thoroughly together. Dose—1 tablespoonful once or twice daily.

We have put this up a great many times, and consider it one of the best condition powders known. It is good for either horses or cattle, in general diseases.

ENGLISH STABLE LINIMENT.—Oil of spike, hartshorn, turpentine, each 2 ozs; sweet oil, oil of amber, each ½ oz; oil of orriganum, 1 oz; mix.

A good horse liniment to keep on hand for general purposes.

PERRY DAVIS' PAIN KILLER.—You can get five times as much of this celebrated medicine, by getting this recipe filled for the same money than you can buy in the bottles in which it is sold.— You can get ½ or ¼ of this filled at one time, if you wish: Alcohol 1 quart; ½ oz. each of opum guiac, myrrh, camphor, and cayenne pepper; 1 oz. each laudanum and sulphuric ether; mix; let stand 3 or 4 days, then strain through a cloth. This is the genuine pain killer. Use same as Perry Davis.

The Myriads of Mankind.

—The number of persons on earth is 1,423,917,000, or 28 persons for every square mile. Europe numbers 309,178,300 souls; Asia, 824,548,500; Africa, 199,921,600; Australia, 4,748,600; America, 85,619,800. The combined populations of 1876 exceed those of 1875 about twenty-seven millions. The inhabitants of various States of Europe are divided as follows: Germany, 42,723,000; Austria-Hungary, 37,700,000; Switzerland, 3,669,147; Holland, 3,809,527; Belgium, 5,336,841; Luxemburg, 205,153; Russia, 71,730,960; Sweden, 4,383,291; Norway, 1,802,882; Denmark, 2,303,000; France, 36,102,921; Great Britain, 3,430,000; Spain, 16,551,647; Portugal, 4,298,861; Italy, 27,482,144; Monaco, 5,741; the Republic of Andorra, 12,000; Turkey in Europe, 500,000; Roumania, 5,073,000; Servia, 1,377,078; Montenegro, 129,000; Greece, 1,457,894. The population of Turkey in Europe, Asia and Africa reaches 47,600,000 souls, of whom 20,500,000 are divided between Egypt, Tripoli and Tunis, and 13,000,000 in Asia. The population of Russia is estimated at 86,536,000, or 900,000 over the population of 1875. The population of the British Indies numbers 289,000,000, that of China 405,000,000, and that of Japan 33,299,015. London has 3,489,428 souls; Paris, 1,861,792; New York and Brooklyn, 1,535,622; Berlin, 1,045,000.

Use in the mouth in cases of sore throat.

BAKED POTATOES.—Potatoes are more nutritious baked than they are when cooked in any other manner, and in general they are better relished. Wash them clean but do not soak them; bake them as quickly as possible, without burning them in the least. As soon as they are done press each potato in a cloth, so as to crack the skin and allow the steam to escape. If this is not done the best potatoes will not be mealy. They should be brought immediately to the table, as they will soon become solid and lose their flavor.

POTATO YEAST.—Peel twenty potatoes, pour over boiling water enough to cover them, add one handful of salt, then cook. When done, do not pour the water off, but beat with a fork until quite fine. Then take four of Twin Brothers' yeast cakes, dissolve in one pint of warm water, add one teaspoon of white sugar, and let stand for about one hour; then add to the above. When well mixed, put in another handful of salt. It will be ready the next day to put in the yeast jug. One small teaspoon of this yeast, with a tablespoonful of sugar in it, is enough for five loaves of bread.

VETERINARY.

SWEENT.—What do you think of the operation of ripping up the skin and prying it loose from the shoulder for an atrophy, commonly called sweent? *Answer.*—We would disapprove of it.—*Wilkes' Spirit.*

WINDGALLS.—I have a colt coming three years in June. Last winter, while in the stable, he got in the habit of pawing and hitting his knee against the manger, which caused two soft lumps to come on the knee-pan. Please inform me of some remedy. *Answer.*—The "soft lumps,"

POSITIVE CURE FOR HOG CHOLERA.—One-quarter of a pound of Spanish brown, one-half pound of copperas, one pound of sulphur, two pounds of charcoal, one pound of dry and three pounds of green poke-root and three gallons of water; boil well one hour and put in trough with drinking water as strong as hogs will drink. If a hog is too sick to drink, drench once or twice.

ENLARGED HOCKS.—I have a colt 3 years old, whose hocks are slightly enlarged, caused by kicking in the stable. Can I cure them? if so, how shall I do it? *Answer.*—You can probably cure them by removing the cause, and to accomplish this take a short piece of heavy chain about a foot long, place a strap through one of the end links, and buckle it around his lower pastern when in the stable. This will prevent his kicking and no doubt remove the difficulty you complain of.—*Durf, Field and Farm.*

FARCY.—Farcy consists of an organic change in the character of the blood, which is influenced by a specific poison similar to if not the same as that known as glanders. The outward seat of the disease is in the skin in farcy, but in the lining membrane of the nose in glanders. The one may be produced by inoculation with the other. Farcy appears at first as small hard knots in the skin, called "buds." These soon soften and suppurate. The pus is absorbed, poisons and inflames the surrounding tissue, and by and by another or other buds appear in the neighborhood of the old one, with which they are connected by a line or cord of thickened tissue. The old bud becomes ulcerous. Thus the disease spreads until the horse is a loathsome and miserable object. The general system is affected, tubercles are formed in the lungs, and death is rapid. The disease is highly contagious

There are two occasions when we do not trust another, — one when we don't know him, the other when we do.

If you want to keep your boy at home, make it pleasanter for him than the street.

Censure is a tax a man pays to the public for being eminent.

Laughter is one of the products of civilization. In uncivilized tribes laughter is entirely unknown.

Said a young lady just off a sleeping-car: "My berth was nearly the death of me."

"Emotional aphasia" is a disease in which the patient, whenever he opens his mouth, speaks only nonsense. This disease is frightfully epidemic in Congress.

The sun is a molten or white-hot mass, 856,000 miles in diameter, equalling the bulk of 1,200,000 worlds like our own, having a surrounding ocean of gas on fire, 50,000 miles deep, tongues of flame darting upward more than 50,000 miles, volcanic forces that hurl into the solar atmosphere luminous matter to the height of 100,000 miles. Thus he continues his sublime and restless march through his mighty orbit, having a period of more than 18,000,000 of years.

SEVEN SERMONS.

Oh! be not the first to discover
A blot in the fame of a friend,
A flaw in the faith of a lover,
Whose heart may prove true in the end.

We none of us know one another,
And oft into error we fall;
Then let us speak well of our brethren,
Or speak not about him at all.

A smile or a sigh may awaken
Suspicion most false and untrue;
And there our faith may be shaken
In the hearts that are honest and true.

How often the light smile of gladness
Is worn by the friend that we meet,
To cover a soul full of sadness,
To proud to acknowledge defeat!

How often the sigh of dejection
Is heaved from the hypocrite's breast,
To parody truth and affection,
Or hush a suspicion to rest.

How often the friends we hold dearest
Their noblest emotion conceal,
And become the purser, sincerest,
Have secrets they cannot reveal.

Leave loose men to harbor suspicion,
And small ones to trace out defects—
Let ours be a noble ambition,
For true is the mind that suspects.

ADVICE IN CASES OF POISONING.

Stir into a glass of water a heaping teaspoonful each of salt and mustard and drink immediately. One or more doses will cause vomiting, and cleanse the stomach. To overcome the effects, swallow the whites of two or three eggs, and drink a cup or two of strong coffee. Sweet oil, taken freely, is excellent in poisoning.

INTEREST TABLE.

A SIMPLE RULE FOR ACCURATELY COMPUTING INTEREST AT ANY GIVEN PER CENT. FOR ANY LENGTH OF TIME.

Multiply the *principal* (amount of money at interest) by the *time reduced to days*; then divide this *product* by the *quotient* obtained by dividing 360 (the number of days in the interest year) by the *per cent.* of interest, and the *quotient thus obtained* will be the required interest.

ILLUSTRATION.

Require the interest of \$402.50 for one month and eighteen days at 6 per cent. An interest month is 30 days; one month and eighteen days equal 48 days. \$402.50 multiplied by 48 gives \$222-0000; 360 divided by 6 (the per cent. of interest) gives 60, and \$222-0000 divided by 60 will give you the exact interest, which is \$3.70. If the rate of interest in the above example were 12 per cent, we would divide the \$222-0000 by 30 (because 360 divided by 12 gives 30); if 4 per cent., we would divide by 90; if 8 per cent., by 45, and in like manner for any other per cent.

Solution.	
\$402.50	
48	
370000	
61300	185000

CURE FOR RATTLE SNAKE BITE.—See advertisement of Dr. J. W. Eighmy in another column. This remedy is warranted to give relief in 20 minutes to any one suffering from the bites of poisonous insects and even the deadly rattlesnake has its poison overcome by the use of this preparation, which costs but \$1.00 per bottle.

PROFESSOR BUSH'S RECIPES.

RING BONE RECIPE.

One oz. Vitriol. One oz. Spirits Turpentine. One oz. Spanish Flies. One oz. British Oil.

Well mixed together. Eight or nine times ointing is generally sufficient to effect a cure. Once a day or once in two days as is most convenient.

BONE SPAVIN RECIPE.

Take dog's grease $\frac{1}{2}$ pint; best oil of origanum $1\frac{1}{2}$ ounces; pulverized cantharides $\frac{1}{2}$ ounce. Mix, and apply each morning, for three mornings; heating it in with a hot iron each time; then skip three mornings, and apply again, as before, until it has been applied nine times; after which wait about ten days, and if it is not all gone, go over again in the same way.

POLL-EVIL AND FISTULA RECIPE.

Rock salt and blue vitriol, of each 1 oz.; copperas $\frac{1}{2}$ ounce; pulverize all finely and mix well; add to this a little soft soap.

Fill a goose-quill with the powder and push it to the bottom of the pipe, having a stick in the top of the quill, so that you can push the powder out of the quill, leaving it at the bottom of the pipe; repeat again in about four days, and in two or three days from that time you can take hold of the pipe and remove it, without trouble.

Henry Tischer says that if one volume of castor oil be dissolved in two or three volumes of spirits of wine, it will render paper transparent, and, the spirit rapidly evaporating, the paper in a few minutes becomes fit for use. A tracing in pencil can then be made, and if the paper is placed in spirits of wine, the oil is dissolved out, restoring the paper to its original condition. The drawing may then be completed in Indian ink or in colors.

Physicians' Prescriptions Carefully Prepared.

RAT TRAP.—Fill a barrel half full of water. Make the cover $\frac{1}{2}$ inch smaller all round than the inside of the top of the barrel. Drive a nail or wire on each side of the cover, exactly opposite each other, as a pivot, and fit it to the barrel, so that a light weight will readily tip the cover. Put the bait on top, in a firm way, and place an empty barrel or box near by. This is a simple, but excellent trap.

TEMPERANCE LECTURE.—Dr. J. W. Eighty will deliver a free lecture on temperance, at the Congregational Chapel, on to-morrow (Friday) evening. We hope to see a full turn out.

RAT POISON.—Recent experiments have shown that squills is an excellent poison for rats. The powder should be mixed with some fatty substance, and spread upon slices of bread. The pulp of onions is also good. Rats are very fond of either.

The earth, per day, moves 1,601,900 miles in its orbit, 66,736 per hour, and 1112 miles per minute.

MADEIRA LINIMENT.—For Hoof or
Bent.—Alcohol, $\frac{1}{2}$ pt.; sweet oil, oil
orrrganum, spirits turpentine, hartshorn,
and camphor gum, of each $\frac{1}{2}$ oz; pul-
verized spanish fly, $\frac{1}{2}$ drachm.
This recipe is published now for the
first time. We have put up barrels of
this Liniment at our drug store, and it
is worth all the other Liniment sold.
For a general Liniment for man or beast
it can't be beat. Where you want to
use it for a person, I would substitute
about 1 drachm of tincture spanish fly,
as the pulverized would be too strong,
and probably blister a little.

SILOAN'S HORSE OINTMENT.—Resin 4
ozs; bees wax 4 ozs; lard 9 ozs; honey 2
ozs; melt these articles slowly, gently
bringing to a boil, as it begins to boil,
remove from the fire, and slowly add a
little less than a pint of turpentine, stir-
ring all the time, this is being added, and
set until cool. This is an excellent oin-
ment for bruises of all kinds, cracked
heels, &c., and is just as good for use on
a person.

A TEA made of peach leaves is a sure
cure for kidney difficulty. A plaster made
of fresh tar is a sure cure for cancer,
which, with all its roots, will come out.
A tea made of chestnut leaves, drunk in
the place of water, will cure the most ob-
stinate case of dropsy, in a few days. A
tea made of ripe or dried whortleberries,
and drunk in the place of water, is a
speedy cure for scrofulous difficulties,
however bad.—*Memphis Register.*

J. W. Eighmy M. D.

Physicians' Prescriptions Carefully Prepared.

The eclipse of the moon was first recorded at Babylon, n.c. 721, March 19. It was proved at the last transit of Venus, that she has an atmosphere, although she must have a climate so warm that earthly beings could not live there, — possibly she has people who can.

You have 208 bones and 600 muscles, your blood weighs 25 pounds, your heart is 5 inches in diameter, it beats 79 times per minute, 4,200 times per hour, 100,800 per day. At each beat a little over 2 ounces of blood is thrown out of it; and each day it receives and discharges about 7 tons of that wonderful fluid.

Owing to the precession of the equinoxes, the winters of the northern hemisphere were once intensely cold, as well as much longer, for periods of 10,500 years, while, during the alternate periods, the winters would be mild and short, the summers cool and long. Thus the cold and glacial epochs have marked about ten thousand years, alternating with mild epochs for the same period, for fully half of the last three million years.

Boxing the ears is an inexcusable brutality; many a child has been made deaf for life by it, because the drum of the ear is a membrane, as thin as paper, stretching like a curtain just inside the external opening of the ear. There is nothing but air is liable to rent it, and any violent sensation is destroyed forever, because the sense of hearing is caused by the vibrations of this drum, or "tympanum."

Laudanum Sympom.—The following articles make a better medicine for coughs and colds, than any patent preparation you can buy, and does not cost half so much, in proportion to the amount you get in the bottles:
Camphor Sympom of squills, 3 oz; paregoric, 1/2 oz; syrup ipecac, 1 oz; sweet spirits nitre 1/2 oz; water, 1 oz. mix.
How.—1/2 to 1 tealeaspoonful every 3 or 4 hours, according to the severity of the cold.

Valuable Recipes.
ROSE SYMPOM OINTMENT—500 Rb. oil. — Corrosive sublimate, quinine, and boiling, of each one oz, with sufficient lard to form a paste.
How.—Put the half the size of the bone extract in a glass mortar all around it but not when the hair is shaved off; this prevents the action of the medicine on the skin. Upon the spavin, now rub in as much of the paste as will fit on a 3 cent piece only, each morning, for four mornings. In front of the eye, to fight the whole spavin will come out; then wash out the wound with castile soap-suds, working well for an hour or two, which removes the poisonous effects of the medicine, and makes it heal more rapidly; the application of some healing salve would also be good; but we prefer the Green Mountain Ointment to any other. A man in Detroit, Mich., paid \$300 for this recipe, and he says it never fails.

Celebrated Mustang Liniment.
Fortunes have been made out of the following recipe, both by selling the formula and by the manufacture and sale of the medicine. It is a really good thing and worth all it ever cost. Veterinary surgeons would hardly think of prosecuting their profession without it. We are glad to give the patrons of this book so valuable a recipe.
Camphor gum 1 ounce, alcohol 1 pint, oil spike 1 ounce, oil origanum 1 ounce, olive oil 1 pint, spirits turpentine 1 ounce, spirits hartshorn 1 pint, oil peppermint 1-2 ounce. Mix and shake well before using.

Strive to do right because it is right; shun the wrong because it is wrong.
Sin is bad in the eye worse in the tongue, worse still in the heart, but worst of all in the life.

Magic Toothache Drops.
Mix together equal parts of laudanum, tincture of myrrh spirits of camphor and oil of cloves. Apply to the affected tooth on a little lint.

Physicians' Prescriptions Carefully Prepared.

OF POISONS.—Cases of Poisoning: see, so sudden and awful that no time is to be lost in administering relief. Our chief reliance in these cases is upon Free Vomiting, induced by those articles which are most speedy in their effect. Sulphate of Zinc is often used, but if vomiting, we may add it by warm drinks of a mustard or salt water emetic. To protect the stomach and intestines from the direct operation of poisons, it is generally recommended to give milk, lime water, soap, or drinks sweetened with sugar or honey, oils and other fatty substances or innocuous. When the vomiting has ceased, and retching and pain continue, give freely of Carbonate of Magnesia with Laudanum, in water. Where alcohol has been taken, keep the patient aroused and stimulate the stomach soon as possible. Large draughts of tea or coffee should be given till the stomach is thoroughly evacuated.

Antidotes, or Vomiting from Arsenic, Potash, Soda, Corrosive Lye, give freely of Cloves, Vinegar and Olive Oil.

For Poisoning from Arsenic, give Whites of Eggs in Milk, and give it every 15 minutes of Zinc in Milk, and the Hydrated Peroxide of Iron.

Vomiting from Sulphate of Copper or Bicarbonate and Trinitro-galis, give Whites of Eggs, Milk, Tepid Water, Whipped Flour—all good. Vinegar in all cases must be avoided.

Laudanum, when taken in large quantity, must be withdrawn from the stomach by Active Emetics or by Tickling the Throat, give freely of Herb Astringents and Strong Coffee. Use stomach pump if necessary.

Poisoning from Mercury.—Give freely of Whites of Eggs *Sulphate* is often taken in mistake for Epsom or Glauber Salt. When this happens, produce vomiting speedily as possible, followed by the free use of Gum Arabic Water, Hot Gin Tonic, Brandy and Water, etc. If these means fail, we must resort to the Stomach Pump.

Poisoning from Opium.—Keep the Patient Awake and give freely of Strong Coffee and Emetics of Sulphate of Zinc or Sulphate of Copper.

Oxalic Acid.—Give Lime Water or a Mixture of Chalk and Water.

Poisoning from Stramonium.—Emetics of Sulphate of Zinc and Aloin *M.*—For silencing cough, covering the worn parts of pained lungs, etc., take nitrate of silver, common salt, each thirty grains, crown of tartar, three and one-half drams; mix; add granular cold water, and rub on the article to be silenced.

RUSSIAN LIQUID GILT.—This is prepared by softening 100 parts best Russian glue in 100 parts warm water, and then adding slowly from 5½ to 6 parts aqua fortis, and finally 6 parts powdered sulphate of lead. The latter is used in order to impart to it white color.

TO KEEP AWAY MOSQUITOES.—Dip a piece of sponge or flannel in ammoniacal spirits, and make it fast to the top of the bedstead. A decoction of pennyroyal, or some of the bristled leaves, rubbed on the exposed parts, will effectually keep off those troublesome insects.

FOR STUBBORN CONSTIPATION OF THE BOWELS AND VERY SEVERE PAIN.—Inject in Bowels Castor Oil in Gentle Soap Suds, with a few drops or from half to one teaspoonful of Turpentine in, as needed, and Mustard Poultice over the Bowels.

Sweet Spirits of Nitro.—Much employed as a medicine to warm the stomach, procure perspiration, relieve Nausea, and speed for the Kidneys and Stomach of the Uterus.

GROUND MUSTARD.—As a mild Emetic, use one teaspoonful of a pint of warm water. For a Bilious one teaspoonful or more as required, mustard-seeds in water.

ESSENCE OF PEPPERMINT.—Soothing and sedating for the Stomach and Bowels; useful in flatulency. Dose, from 10 to 30 drops in sweetened water.

Extracts Lemon and Vanilla.—These are nice Flavoring Essences, either for food or medicine. From 2 drops to a teaspoonful makes a very pleasant.

SPIRITS OF HARTSHORN.—Great for Headache, Nervous and Catarrh. Puff with the nose and inhale freely in the nostrils.

CASTOR OIL.—Use Cathartic for the Bowels—safe and soothing in all cases. Dose, from half teaspoonful to two tablespoonful in twice the quantity of sweetened milk and sweetened.

pure Glycerine.—A useful External Application for Scaly Itch, Nipples, Sores, Chapped Hands, sunburn and Wounds of all kinds.

SWEET OIL.—Good to Soften and Remove Scurf from the Scalp; Soothe sores and Burns and useful for various purposes, and an Antidote for Irritant Poisons.

SEIDLITZ POWDERS.—A mild and pleasant Purgative. Good for all Headed conditions of the Blood.

Man starts in a state of rude simplicity, knowing nothing of the conditions which surround him. He has to learn that the earth is not a plain; that the stars are not mere points of light, set at intervals in the vast region of space; that the atmosphere is a fluid; and that he walks at the bottom of a sea of air.

A STRONG CEMENT.—Mix a handful of quicklime in four ounces of linsseed oil; boil them to a good thickness, spread it on tin plates in the shade, and it will become a hard size that will resist heat or moisture. It may be easily dissolved over the fire, like glue.

TRIPLE ALC.—See our next number. **R. H. N. and Assoc.**—To DYE RAIN HAIR: To one drachm of lunar caustic add enough aqua ammonia to dissolve the caustic; then add two ounces of distilled water. This dye is black. By adding double the quantity of water a lighter or brown shade will be produced. Apply with a tooth brush, and be careful not to touch the skin. **Onions.**—1. Use a little charcoal powder and good hot water occasionally. 2. For Itchiness. For Nails see No. 28. **E. S. B.**—We cannot and you. **Teazle Jack.**—Coccolus Indicus. **G. and S.**—A little sulphur and water will remove dirt. **G. and S.**—We do not know the price. **Hermit Recipe.**—A New WATERPROOF. We give the following recipe as published in an English paper, without consulting for its reliability. The writer who publishes it says: "For many years I have worn hair-traveler waterproofs, but will say no more, for I have learned that good Scotch rain-proofed can be made entirely waterproof to rain, and, moreover, I have learned how to make it so; and for the benefit of your readers, I will give the recipe. In a bucket of soft water put half a pound of sugar of lead, and half a pound of powdered alum; stir this at intervals, until it becomes clear, then pour it off into another bucket, and put the garment thereon, and let it be in it for twenty-four hours, and then hang it up to dry without wringing it. Two or three parts of A. L. and Gentianum—leave with garments this time treated in the highest degree of water and rain without wetting. You can hang upon the wall in globular. In short, they were really waterproof. The gentleman, a fortuitous man, walked nine miles in a storm of rain and wind, such as you rarely see in the South; and when he stepped off his overcoat, his underclothes were as dry as when he put them on. This is, I think, a secret worth knowing; for cloth, if it can be made to keep out wet, is in every way better than what we have as most waterproofs." **A. N. S.**—See our next number.

OF POISONS.—Cases of Poisoning: see 20 sudden

and several that no time is to be lost in administering relief. Our chief reliance in these cases is upon free vomiting, induced by those articles which are most speedy in their effect. Sulphate of Zinc is often used, but if vomiting, we may add to warm drudge or a mustard or salt water emetic. To protect the stomach and intestines from the direct operation of poisons, it is generally recommended to give milk, lime water, soup, or drinks sweetened with sugar or honey, oils and other fatty substances or mucous. When the vomiting has ceased, and retching and purgation, give freely of Carbonate of Magnesia with Laudanum, in water. Where alcohol has been taken, keep the patient aroused and evacuate the stomach soon as possible. Large draughts of tea or coffee should be given till the stomach is thoroughly evacuated.

Alkalies, or Poisoning from Ammonia, Potash, Soda, Concentrated Lye, give freely of Common Vinegar and Olive Oil.

For Poisoning from Arsenic, give Whites of Eggs in Milk, and give it freely of sulphate of Zinc in Milk, and the Hydrated Peroxide of Iron.

Poisoning from Sulphate of Copper or Bismuth and Verdigris, give Whites of Eggs, Milk, Tepid Water, Whipten Flour—all good. Vinegar in all cases must be avoided.

Laudanum, when taken in large quantity, must be withdrawn from the stomach by Active Emetics or by Treating the Throat, give freely of Hated Astringents and Strong Coffee. Use stomach pump if necessary.

Poisoning from Measles.—Give freely of Whites of Eggs

Sulphate is often taken in mistake for Epsom or Glauber Salt. When this happens, produce vomiting speedily as possible, followed by the free use of Gum Arabic Water, Hot Gin Tonic, Brandy and Water, &c. If these means fail, we must resort to the Stomach Pump.

Poisoning from Opium.—Keep the Patient Awake and give freely of Strong Coffee and Emetics of Sulphate of Zinc or Sulphate of Copper.

Crude Acid.—Give Lime Water or a Mixture of Chalk and Water.

Poisoning from Stychnine.—Emetics of Sulphate of Zinc and Mustard, Whites of Eggs and Sweet Oil.

Zinc.—The sulphate of this metal is occasionally taken in an overdose. Warm Water and Emetic Tartaric Acid are preferred; but Milk, Magnesia and Whites of Eggs are especially good.

Emetics.—Lobelina, Ipecacuanha, Mustard and Salt Water, from one quarter to one teaspoonful of the Tincture of the above, or Powder, follow'd by Warm Water Drinks, will generally produce free vomiting.

Medicines in liquid form in all cases should be Well Shaken before taken.

A STRONG Calx lime in four of to a good thick the shade, and will resist heat dissolved over

Man starts in a state of rude simplicity, knowing nothing of the conditions which surround him. He has to learn that the earth is not a plain; that the stars are not mere points of light, set at intervals in the vast region of space; that the atmosphere is a fluid; and that he walks at the bottom of a sea of air.

Warning from Tartar Emetic produces free vomiting; aided by arising distended and marasmus propensities. The Antidotes are the Alkalies, Tartar, Butter and Astringent Infusions, such as Cinnamon Tea, Peruvian Bark and Gallie in Powder.

The Dose of Sulphate of Copper as an Emetic is from 2 to 5 grains. The Dose of sulphate of Zinc as an Emetic is from 16 to 30 grains.

For In all cases the Dose for Infants and Children is Proportionally Less than for Adult or grown Persons. This rule applies to All our Remedies.

Stimulating the Stomach and Intestines.—A small Dose, from 10 to 20 Drops in an even 4 water

Extracts Lemon and Vanilla.—These are nice Elixirs for use either for food or medicine. From 5 drops to a teaspoonful makes everything palatable.

SPIRITS OF HARTSHORN.—Good for headache, Sourstomach and Colic. It will soon stop the sick and inebriated freely in the nostrils.

CASTOR OIL.—Nice Cathartic for the Bowels—safe and soothing in all cases. Dose, from 50 to 100 drops to two tablespoonfuls twice the quantity of sweetened milk and sweetened.

Pure Glycerine.—A useful External Application for Sore Lips, Nipples, Scalds, Chapped Hands, sunburn and Wounds of all kinds.

SWEET OIL.—Good to stop it and to remove scurf from the scalp; Soothes Sores and Burns and useful for various purposes, and an Antidote for Irritant Poisons.

SEIDLITZ POWDERS.—A mild and pleasant Purgative. Good for all heated conditions of the blood.

Hairs, etc.—To grow thick and long. E. H. N. and other. To Dry the Hair. To one drachm of Junar cascade add enough aqua ammonia to dissolve the cascade, then add two ounces of distilled water. This dye is black. By adding double the quantity of water a lighter or brown shade will be produced. Apply with a tooth brush, and be careful not to touch the skin. *Quinine.*—1. Dissolve a little charcoal powder and good Colic soap occasionally. 2. For Icterus, see No. 25. E. H. N. B.—We cannot and you *Zeus Jack*—Coconut Indigo. C. and S.—A little sulphur and water will remove dandruff. C. and S.—We do not know the process. *Marshall Field*—A NEW WATERPROOF. We give the following recipe as published in an English paper, which you may wish to see for its reliability. The writer who furnishes it says: "For many years I have worn India-rubber waterproofs, but will buy no more, for I have learned that good Scotch tweed can be made entirely impervious to rain, and, moreover, I have learned how to make it so; and for the benefit of your travellers I will give the recipe. In a bucket of soft water put half a pound of finest of yeast, and half a pound of powdered alum; stir this at intervals, until it becomes clear, then pour it off into another bucket, and put the garment therein, and let it be in it for twenty-four hours, and then hang it up to dry without wringing it. Two or my party—a lady and gentleman—have worn garments thus treated in the wildest storms of wind and rain without getting wet. The tin buttons upon the coat in question, in short, they were really waterproof. The gentleman, a fortnight ago, walked nine miles in a storm of rain and wind, such as you rarely see in the South; and when he stepped off his overcoat the underclothes were as dry as when he put it on. This is, I think, a secret worth knowing; for, if it can be made to keep out wet, is in every way better than what we know as most waterproofs." J. Nelson—See our next number.
