

Public Lecture on the Occasion of Albert Einstein's Birthday

THE LIFE AND SCIENCE OF ALBERT EINSTEIN

SPEAKER: Dr. Fridolin Weber
Albert Einstein Academies
3035 Ash Street, San Diego
Tuesday, March 15, 2011 at 6:30 PM
Donations are welcome

Albert Einstein (1879-1955) was a theoretical physicist known to the world as one of the most important figures in science. His discoveries solved century-old problems in physics and astronomy and continue to play a key role for our understanding of the modern world. This lecture is intended to make Einstein's fascinating discoveries accessible to a general audience.
All ages are welcome!

Fridolin Weber is a professor of physics at San Diego State University. He has a PhD in theoretical nuclear physics as well as a PhD in theoretical astrophysics, both from the Ludwig Maximilian University of Munich, Germany. He has published several books, over 130 scientific papers, and has given more than 230 talks at international conferences.
