

Project Grading Sheet

Name of the Speaker _____

You are to grade the speaker for this modeling talk. I want an honest opinion of the presentation given. Assign points for each of the categories listed with a high score being the best. (Note that the scales are different for different categories.)

Clarity of the presentation (0-15)....._____

Did the speaker talk clearly and understandably?

Did the speaker make good use of visual material?

Did the speaker engage the audience?

How well the speaker kept to the allotted time (0-5)_____

How difficult was the problem addressed by the speaker? (0-20)_____

Was the problem addressed at the appropriate level for this class?

Was the problem an interesting and useful modeling application?

What level of mathematical skill was required?

Were the mathematical and modeling ideas well connected?

Did the speaker understand the complexities of the problem and adequately address them?

How well did the speaker do on the problem presented? (0-20)....._____

Were the ideas well-organized to make the problem easy to follow?

Was the talk well-organized and interesting?

Were the model and mathematical ideas explained well?

Were adequate details provided to connect the ideas presented?

Did the speaker address the importance and relevance of the problem?

Total....._____
